

# BRTT Antelope Contrib Policies

Dr. Kent Lindquist

January, 2015

San Diego, CA AUG

# BRTT contrib goals

- Provide enhanced functionality to users
- Encourage community-building
- Venue for users to meet parochial/esoteric needs

# BRTT contrib goals

- *Laissez-faire* approach from BRTT
  - We don't want to touch it
  - Tell us what branch to pull from for devel/release
  - Reserving right to exceptions for things we've written or put in ourselves
- Clear engineering distinction between contrib and commercial
  - witness *xpls*, *smartpick*, *localmake* problems

# BRTT contrib policies

What we need in each contrib submission:

- Man page with name, synopsis, author specified
- Antelopemake-compatible Makefile
- *Explicit license with distribution terms* \*NEW
  - e.g. BSD, MIT
  - not distributing GPL, LGPL
  - See <http://opensource.org/licenses>
  - not all open-source licenses are created equal

# New ANTELOPEMAKE extension mechanism

- Keep using
  - include \$ANTELOPEMAKE
- If:
  - SUBDIR is specified e.g. SUBDIR=/contrib
  - there exists  
\$(ANTELOPE)\$ (SUBDIR)/include/antelopemakerules
- Then \$(ANTELOPEMAKE) will include it

# Thank You
